**Grid 1 - pre-defined grids in 2-layer soil** [ X ] Plus  
[ X ] Pro  
[ X ] LE

dimensions lay-out of grid and layers

The screenshot shows the software interface for configuring a grid. On the left, there are input fields for 'width' and 'height', and a 'Configuration' section with radio buttons for 'All nodes + 1 to 10 nodes' and 'All nodes (2 to 10)'. A yellow arrow points to the 'width' field. On the right, a diagram titled 'Grid 1 - building' shows a rectangular grid with dimensions 'b' (width) and 'd' (height). Above the grid, there are labels for 'h' (height of a layer), 'c' (width of a layer), and 'e' (height of a layer). A blue arrow points from the 'lay-out of grid and layers' text to the diagram.
